

AAP Lead Testing ECHO

AAP Lead Testing ECHO (Extension for Community Healthcare Outcomes)

The AAP is currently recruiting pediatric primary care practices to participate in the AAP Lead Testing ECHO. Project ECHO is a telementoring program designed to create communities of learners by bringing together health care providers and experts in topical areas using didactic and case-based presentations, fostering an “all learn, all teach” approach. Using videoconferencing technology, quality improvement methodology, clinical management tools, and case-based learning, health care providers develop knowledge and self-efficacy on diseases, conditions, and/or processes. This program will offer CME, Maintenance of Certification (MOC) Part 2 and MOC Part 4 credit to participants.

The AAP Lead Testing ECHO serves as a forum for pediatric primary care practices to improve knowledge, skills and self-efficacy around blood lead testing and follow-up care in order to better identify and treat children affected by lead exposure. PEHSU faculty will serve as “hub” subject matter experts, with primary care practices as “spokes”. This ECHO incorporates quality improvement work and will meet monthly January through July 2020. More information is available in the [AAP Lead Testing ECHO project flyer](#); to participate, please complete the [AAP Lead Testing ECHO application](#). The links to both of these documents can be found on our website at [www.HomeStateHealth.com/Provider/Provider Training](http://www.HomeStateHealth.com/Provider/Provider%20Training).

The **deadline to apply is extended to Wednesday, January 15, 2020.**
