

Dear colleagues,

Many patients across Missouri experience varying degrees of asthma symptoms. Young children are especially vulnerable and require the help of their primary care doctor, specialist, ED physicians, parents, and schools to help reduce their risk factors for an attack and keep their symptoms under control.

Show-Me ECHO is one tool available to all our Missouri physicians to learn from colleagues and local experts, pressure test our knowledge, and solidify our evidence based practice. Home State Health Plan supports the Show-Me ECHO initiative.

The Asthma Care and Education (ACE) ECHO series created by the Asthma Ready Communities Programs is an innovative way to collaborate with colleagues across the state to brainstorm solutions for uncontrolled asthma. ACE is the 3<sup>rd</sup> ECHO in the Asthma series. I highly encourage your participation in this exceptional learning opportunity.

Visit the Show-Me Echo website to register and learn more about upcoming ECHOs. Find out more about ACE ECHO at: <https://showmeecho.org/clinics/ace/>

Thank you,

Jennifer Wessels, MD, MHA
