### Policy Overview

To ensure provider's bill the correct level of evaluation and management (E&M) CPT® codes when billing for physician's consultation services. Furthermore, to encourage providers to bill consultation services based on 1) where the visit occurred and, 2) the complexity of the visit performed.

The purpose of this policy is to define payment criteria for consultation services to be used in making payment decisions and administering benefits.

### Application

Physician and other qualified health professionals that perform initial E&M services.

### Policy Description

The American Medical Association (AMA) Current Procedural Terminology (CPT ®) book describes a consultation as a type of evaluation and management service provided at the request of another physician or appropriate source to either recommend care for a specific condition or problem, or to determine whether to accept responsibility for ongoing management of the patient's entire care, or for the care of a specific condition or problem. Consultation codes are found in the 9941-99255 range of the CPT® code book.

In 2006 the Office of Inspector General (OIG) reported that 75 percent of services billed as consultations were improperly paid and did not meet correct coding standards. Specifically, provider documentation did not support that a consultation service had been rendered and in the case where a consultation service was supported by the documentation; many visits were coded at the incorrect type or level of service.

In 2011, the Center for Medicare and Medicaid Services (CMS) eliminated the use of consultation codes for payment of E&M services furnished to fee-for-service Medicare recipients. The services can still be covered if they are medically necessary using the appropriate office visit, emergency office visit and initial hospital services codes.

### Reimbursement

The Health Plan will reimburse consultation codes at the corresponding E&M visit level. The provider should bill the E&M code (other than the consultation code) that describes the service provided.

**Utilization**

The health plan will identify consultation codes 99241-99255 and crosswalk them to the more appropriate level of office visit, initial inpatient visit or emergency department procedure code. The provider will be paid according to the fee schedule for the equivalent procedure code.

Office of Inspector General (OIG)

The OIG is a division within the United States Department of Health and Human Services (HHS). The OIG was established in 1976 to fight waste, fraud and abuse in Medicare, Medicaid and other HHS programs. The organization assists the health care industry by conducting health audits, investigations and evaluations to ensure compliance with nationwide fraud and abuse laws. The OIG also serves to educate the public about fraudulent schemes so that consumers can protect themselves and understand the process for reporting suspicious activities.
