

Dear Home State Health Provider,

International Overdose Awareness Day is a global event held annually on August 31st. The day's primary focus is to raise awareness that death from drug overdose is preventable. At Home State Health, we want to partner with our provider community in the effort to minimize the risk of overdosing in communities across Missouri. On this day, we not only remember those that we have lost, but we also use it as a day of hope. The hope we see in recognition of tens of thousands of lives that have been saved from overdose. Please join us in the call of further action to end the overdose crisis.

Kind Regards,

Chris Brown, RPh
Pharmacy Director
