

**IMMUNIZATION (SHOT) SCHEDULE FOR CHILDREN**

Immunizations (shots) help prevent serious illness. This record will help keep track when your child is immunized. If your child did not get their shots at the age shown, they still need to get that shot. Talk to your PCP about your child’s immunizations (shots). Children must have their immunizations (shots) to enter school.

| Immunization Record  |                                                                             |               |
|----------------------|-----------------------------------------------------------------------------|---------------|
| Age                  | Shot (Immunization)                                                         | Date Received |
| Birth                | HepB*                                                                       |               |
| 2 months             | DTaP, Hib, IPV, PCV, RV, HepB                                               |               |
| 4 months             | DTaP, Hib, IPV, PCV, RV, HepB*                                              |               |
| 6 months             | DTaP, Hib, IPV, PCV, RV, HepB                                               |               |
| 12-15 months         | Hib, PCV, MMR, Varicella, HepA                                              |               |
| 15-18 months         | DTaP**                                                                      |               |
| 19-23 months         | HepA                                                                        |               |
| 4 - 6 years          | DTaP, IPV, MMR, Varicella                                                   |               |
| 7-10 years Catch-Up  | Tdap, HepB, IPV, MMR, Varicella, HepA                                       |               |
| 11-12 years          | Tdap, MenACWY (1 dose), HPV (2doses)***                                     |               |
| 11-12 years Catch-Up | HepB, IPV, MMR, Varicella, HepA                                             |               |
| 13-18 years Catch-Up | Tdap, MenACWY (1 dose, Booster at 16), HPV, HepB, IPV, MMR, Varicella, HepA |               |

|             |                                                                 |  |
|-------------|-----------------------------------------------------------------|--|
| 16-18 years | MenB****                                                        |  |
| 19-20 years | HPV(3 doses)*****,<br>MMR*****,<br>Tdap*****,<br>Varicella***** |  |
| Every year  | Influenza (after 6 months)                                      |  |

*\*If the birth dose of HepB is given, the 4 month dose may be omitted.*

*\*\*Can be given as early as 12 months, if there are six months since third dose.*

*\*\*\*A 3-shot series is needed for those with weakened immune systems and those age 15 or older.*

*\*\*\*\*Can be given sooner for those that have certain health conditions that would put them at increased risk for serious diseases.*

*\*\*\*\*\*Recommended unless your healthcare provider tells you that you do not need it or should not get it.*
