

Important Notice Regarding Prior Authorization Submission

In an effort to simplify the prior authorization process and to comply with state requirements, Home State Health will require prior authorization requests be submitted electronically beginning on January 1, 2021. Home State Health is currently working to improve our secure provider portal that will allow submission of all prior authorizations for our MO HealthNet Managed Care program members and Missouri Ambetter from Home State Health plans. In preparation for this requirement, we recommend registering for access to the Home State Health secure portal if you have not done so already.

To register for Home State Health's secure portal please go to:

<https://www.homestatehealth.com/login.html>

To determine if a procedure requires prior authorization please utilize our prior authorization tool located at <https://www.homestatehealth.com/providers/pre-auth-needed.html>.

Additional details regarding the updated provider portal and electronic prior authorization submission process will be coming soon.

As always, Home State Health appreciates your dedication to providing quality healthcare to your patients, our members.
