

Important Information on Referral Requirement

Effective immediately, Home State Health will no longer require an active referral from the Primary Care Practitioner (PCP) for Home State Health's Medicaid Managed Care members prior to seeing an in-network specialist.

In- network specialists' claims submitted with a date of service May 6, 2019 or after will not require a referral in order to be paid. If you have a referral in process/pending, and the date of service is May 6th or after, you will not receive a referral authorization as it is no longer required.

Note: This notification is specific to the Medicaid MO HealthNet line of business. Referrals for Allwell from Home State Health members are still required. Please refer to www.HomeStateHealth.com for a list of specialties requiring referrals for Allwell members.
